

# Cloud Computing Solutions

FULL LIFECYCLE CLOUD COMPUTING SOLUTIONS • ASSESSMENT • MIGRATION • DEVELOPMENT • SUPPORT SERVICES

The impact cloud computing has on an organization's ability to maximize IT resources and improve its bottom line is significant. Yet perceived complexities and a lack of understanding have impeded the wide spread adoption of the cloud. As a Microsoft National Systems Integrator with proven expertise in Microsoft cloud computing, Neudesic has developed best practices and intellectual property that help enterprises minimize the risk while maximizing the benefits of moving to the cloud.

From Software-as-a-Service (BPOS, CRM Online) to Platform-as-a-Service (Windows Azure) solutions, Neudesic offers 'full cloud' comprehensive business and technical consulting solutions that span the entire Microsoft technology stack.

## You Have Questions, Neudesic Has Answers

Like most business owners and IT professionals who already have made the move to the cloud, you should first asked yourself:

- Are cloud computing claims believable?
- What is Microsoft doing in the cloud?
- What are the benefits of the cloud?
- Is the cloud a good fit for my business?
- How do I avoid risk?
- What does it cost?
- What ROI will moving to the cloud deliver?
- What belongs in the cloud and what doesn't?
- When is the time right to make the move?

Neudesic will help you answer these questions through a proven assessment process that uncovers and qualifies cloud computing opportunities for your company. We will then help you formulate a sound strategy tailored to your company's culture, objectives and IT assets.

Neudesic's development and migration solutions create cloud-worthy applications that are architecturally sound and follow best practices, and we also provide monitoring, management and governance of deployed cloud solutions. With this arsenal of unique intellectual property at their disposal, Neudesic consultants will help maximize your investment returns as you move your company to the cloud.

## Bringing the Cloud into Focus

Neudesic's Cloud Computing Assessment brings the value of the cloud into focus by providing insight into where cloud computing is most appropriate for your business. Opportunities that maximize the benefits of the cloud for your company are identified and analyzed to determine their suitability and risk/reward factor. This helps our experts create a cloud computing strategy and road map tailored to your business environment and needs.

## National Cloud Specialists

From New York to Los Angeles, Neudesic stands ready to help you move your business into the cloud through education and training, assessments, proof-of-concept projects, migration of existing applications, new cloud development, and support and management of cloud assets in production. Highly skilled on the Microsoft cloud platform, our national team of more than 75 consultants applies its cloud expertise across each of Neudesic's practices, including Application Development, Business Intelligence, Connected Systems, CRM/Dynamics, Mobility, Portals & Collaboration and User Experience.

## Your Cloud Solutions Experts

When it comes to maximizing the benefits of the cloud, Neudesic is your partner of choice. We fully understand the ability of Microsoft's cloud computing platform to provide your company with Software-as-a-Service, Platform-as-a-Service, and Infrastructure-as-a-Service solutions. For one low price per user per month, you can reap the benefits of the cloud through CRM Online, which offers sophisticated Customer Relationship Management, and the Business Productivity Online Suite, which provides users with SharePoint, Exchange, and Office Communications. And to run your own business applications in the cloud, the Windows Azure platform includes hosting, storage, database, communication, security, and reference data services. Make your move to the cloud with help from the cloud solutions experts at Neudesic.

*Neudesic has a national team of more than 75 cloud computing experts.*
