

# CONNECTED Systems

NEUDESIC ENABLES THE COMPOSITION OF NEW AND EXISTING ASSETS INTO INNOVATIVE SOLUTIONS THAT SPAN THE ENTERPRISE AND BEYOND.

## The Neudesic Advantage

- Expert integrators on-premise, in the cloud and across trading partners, leveraging best-of-breed capabilities to deliver service-oriented, hybrid composite solutions
- Microsoft certified experts across the integration stack, including BizTalk, WCF and WF
- Microsoft Connected Systems MVPs and Regional Directors
- More Microsoft Virtual Technology Specialists than any other U.S. partner
- Authors of industry leading publications and books related to cloud, hybrid and distributed computing
- Thought leadership at industry-wide events, including TechEd, VSLive, Code Camp and .NET user group meetings

## Technologies

- Azure Service Bus
- Azure Access Control
- Microsoft BizTalk Server
- Neudesic Neuron-ESB
- Neudesic Industry Accelerators (EDI, Gaming)
- Windows Communication Foundation
- Windows Workflow Foundation
- Windows Server AppFabric

### Applications

- Microsoft Dynamics CRM
- Oracle
- PeopleSoft
- JD Edwards
- SAP
- BAAN
- Siebel
- Salesforce

### Database

- Oracle Database
- DB2
- Microsoft SQL Server

Business and IT leaders looking to improve operational efficiency are combining existing technology with new investments in cloud and hybrid computing to drive differentiation and innovation both inside and outside of the organization.

Neudesic's Connected Systems team delivers comprehensive solutions that drive innovation from systems and software platforms within the enterprise and across business boundaries, while improving efficiency and reducing the operational costs of new and existing assets.

## GETTING GREATER VALUE FROM YOUR RESOURCES

A growing business must meet its needs and challenges with new and existing systems and platforms if it hopes to remain relevant in the marketplace. Before long, however, the value of the whole enterprise begins to fall below the sum of its various parts. Whether these disparate systems reside on-premise, in the cloud or on partner networks, they must be well-integrated before a business can extend its investment in technology and drive future innovation.

Once achieved, the composition of these systems unlocks an organization's true potential by supporting the consumption of application programming interfaces across any user experience, regardless of platform. Only then can an organization differentiate itself and deliver value at the speed of business.

If you're ready to extend the promise of your technology investments across the enterprise and beyond, start with the following questions:

- Are your users easily able to find information and perform the operations required of them?
- Do your users often waste time logging in and out of legacy applications while attempting to perform simple tasks?

- Do your systems and processes exist as silos?
- Do your systems integrate well with partner applications?
- Are you looking to shift key workloads to the cloud, or have assets in the cloud that must communicate with assets on-premise?
- Have your users and systems outgrown your role-based security model?

## SOLVING TOUGH CHALLENGES WITH UNIQUE INSIGHT

Our consultants design, develop and deploy composite solutions that drive differentiation and innovation within your enterprise by unlocking existing investments and building new solutions that are ready for change. Neudesic is a leader in application integration across the technology stack, including BizTalk Server, Neuron-ESB, WCF, WF, and Azure Service Bus. We solve tough distributed challenges, both on-premise and in the cloud, across a range of industries, including transportation, retail, hospitality, finance, health care and energy.

With more Virtual Technology Specialists than any other Microsoft national systems integrator, Neudesic often helps with training, sales presentations, design reviews, architectural design sessions, proof of concepts, and implementation analysis and remediation for Microsoft's most strategic clients.

Our strong partnership with Microsoft gives us the insight to deliver the best strategic guidance possible, ensuring that every Neudesic engagement is effective, productive and advances the business and IT goals of our customers.
