

COUNTERPART FOR ORACLE EBS

BRINGING YOUR E-BUSINESS SUITE AND MICROSOFT BI ENVIRONMENTS TOGETHER

Eliminate barriers, increase productivity and reduce costs

Harness the Power of Your Business Data

Neudesic's CountERP for Oracle E-Business Suite accelerates return on your investment in Microsoft business intelligence and Oracle EBS systems by providing innovative Microsoft-based BI solutions that open the door to corporate data locked away in Oracle EBS.

CountERP for Oracle EBS uses NoetixViews® to deliver the fastest connection possible between decision makers and operational data, streamlining the manually-intensive process of implementing reporting tools and enterprise-wide BI initiatives. Neudesic leverages the power of Microsoft BI within SharePoint to deliver business critical information from the Financial, Supply Chain, Manufacturing and/or Human Resources modules in Oracle EBS.

CountERP solutions for Oracle EBS modules	
Packages	Modules
Package 1 - Financials	General Ledger, Payables, Receivables and Assets
Package 2 - Supply Chain	Order Management, Inventory & Purchase Orders
Package 3 - Manufacturing	MRP, Bill of Materials, Work in Process, Costing, Inventory, and Quality
Package 4 - Human Resources	Human Resources, Payroll, Advanced Benefits, and Time and Labor

With CountERP for Oracle EBS, Neudesic's expert BI consultants will accelerate your goals to develop and deploy BI solutions on Microsoft's proven BI platform against your Oracle EBS environment, helping you:

- Deliver Key Performance Indicators in Microsoft PerformancePoint Services Dashboards and Scorecards
- Enable self-service analysis to your business users through Microsoft Excel PivotTables / PivotCharts and the compelling new PowerPivot capability against Oracle EBS information
- Leverage the power of SQL Server Reporting Services to automate production reports against your Financial, Manufacturing, HR, or Supply Chain information
- Take advantage of often overlooked SQL Server Data Mining functionality to discovery patterns of information hidden in your data

Gain a Competitive Edge

Neudesic BI consultants combine best practice development experience with NoetixViews to deliver CountERP for Oracle EBS solutions in a matter of weeks, not months. The results are BI systems that give your organization a competitive edge by increasing productivity and reducing costs.

Features and Benefits

Needs Analysis

Interview key technical and executive stakeholders to identify your project requirements, key performance indicators, data sources, and delivery methods to be used in your solution.

Rapid Deployment

Installs quickly, enabling users to start accessing data in a matter of weeks. NoetixViews are automatically configured during installation to support customer-specific setups, including key and descriptive flexfields. Access data directly from Oracle EBS using optimized business views from your Microsoft BI tool of choice.

Combine Oracle EBS and Non-Oracle Data

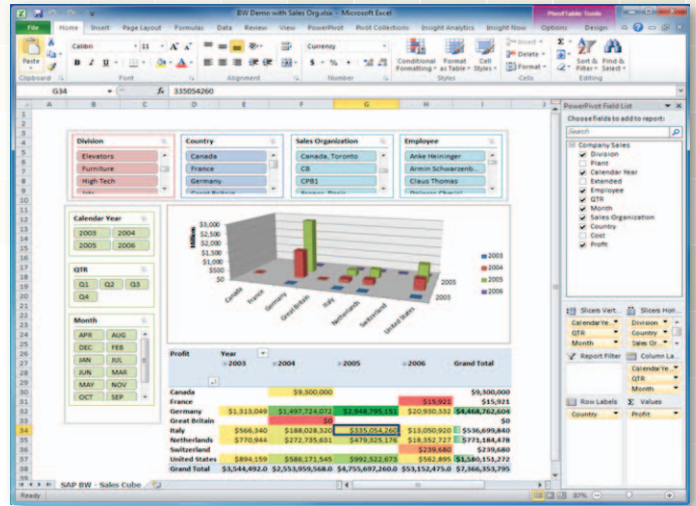

Tight integration with Microsoft SQL Server Reporting Services as well as PowerPivot makes it possible to combine data from multiple sources, giving you a complete view of your business.

Delivered to Your Specifications

Based on the CountERPart for Oracle EBS solution package you choose, Neudesic BI consultants will design and deliver a series of PerformancePoint Dashboards and Scorecards, SQL Server Reporting Services parameterized reports, and Excel / PowerPivot workbooks sourced from your Oracle EBS system.

For more information about CountERPart for Oracle EBS or other Neudesic BI offerings, please contact us directly at 800.805.1805, via email at BI-Solutions@neudesic.com or through your Account Executive.
