

COUNTERPART FOR SAP

BRINGING YOUR SAP AND MICROSOFT BI ENVIRONMENTS TOGETHER

Eliminate barriers, increase productivity and reduce costs

Harness the Power of Your Business Data

Neudesic's CountERPart for SAP accelerates return on your investment in Microsoft business intelligence and SAP systems by providing innovative Microsoft-based BI solutions that open doors to corporate data locked away in your SAP environment.

Whether your business analysts are demanding SAP connectivity to enable self-service analytics or looking for alternatives to SAP BW, Neudesic can help. CountERPart for SAP uses SAP-certified connector technology to deliver the fastest link between decision makers and operational data, streamlining the manually-intensive process of implementing reporting tools and enterprise-wide BI initiatives. Neudesic leverages the power of Microsoft BI within SharePoint to deliver business critical information from the financial, control, sales and distribution, and materials management of SAP.

Microsoft PerformancePoint Services dashboard

CountERPart solutions for SAP modules	
Packages	Module Coverage
Package 1 - Financials	General Ledger, Payables, Receivables and Asset Accounting
Package 2 - Controlling	Profitability Analysis, General and Product Cost Controlling
Package 3 - Sales and Distribution	Sales Document, Sales Shipping and Delivery, Billing
Package 4 - Materials Management	Purchasing and Inventory Management

With CountERPart for SAP, Neudesic's expert BI consultants will accelerate your goals to develop and deploy BI solutions on Microsoft's proven BI platform against your SAP environment, helping you:

- Deliver Key Performance Indicators in Microsoft PerformancePoint Services Dashboards and Scorecards
- Enable self-service analysis to your business users through Microsoft Excel PivotTables / PivotCharts and the compelling new PowerPivot capability
- Leverage the power of SQL Server Reporting Services to automate production reports against R/3, ECC and BW
- Take advantage of the often overlooked SQL Server Data Mining functionality to discovery patterns of information hidden in your data.

Gain a Competitive Edge

Neudesic BI consultants combine best practice development and deployment experience with SAP-certified connectivity to deliver CountERPart for SAP solutions in a matter of weeks, not months. And the results are business intelligence systems that give your organization a competitive edge by increasing productivity and reducing costs.

Features and Benefits

Needs Analysis

Interview key technical and executive stakeholders to identify your project requirements, key performance indicators, data sources, and delivery methods to be used in your solution.

Rapid Deployment

No "Big Bang" IT project required, meaning implementation costs are significantly lower than alternative solutions. Information is live and available for immediate analysis by users and management.

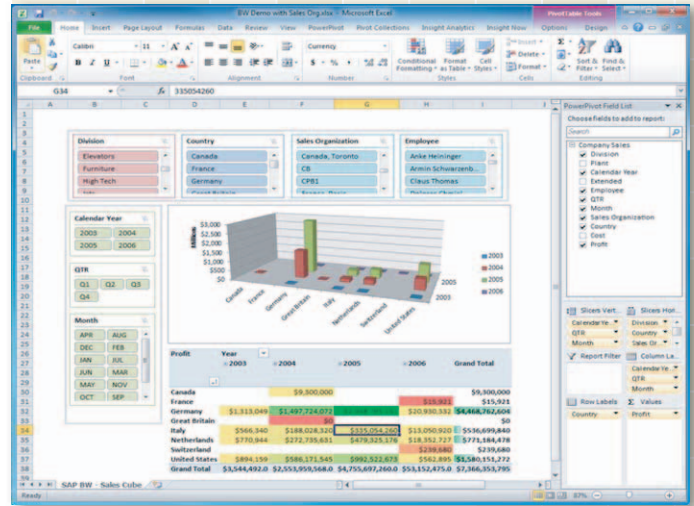

Combine SAP and Non-SAP Data

Tight integration with Microsoft Analysis Services makes it possible to combine data from multiple sources, giving customers a complete view of their businesses.

Delivered to Your Specifications

Based on the CounterPart for SAP solution package you choose, Neudesic BI consultants will design and deliver a series of PerformancePoint Dashboards and Scorecards, SQL Server Reporting Services parameterized reports, and Excel workbooks sourced from your SAP system.

For more information about CounterPart for SAP or other Neudesic BI offerings, please contact us directly at 800.805.1805, via email at BI-Solutions@neudesic.com or through your Account Executive.
