NEUDESIC DESIGNS AND IMPLEMENTS APPLICATIONS THAT SOLVE VERY SPECIFIC BUSINESS PROBLEMS.

The Neudesic Advantage

- A diverse team that consists of:
 - SOA professionals who are noted authors of popular programming books
 - Security experts who often speak at industry trade shows and events
 - Award winners in many industry and Microsoft categories, including customer excellence
 - Microsoft MVP's across C#, SilverLight, and XML Web Services
 - MSDN Ambassador Program members
- Successful delivery of large and complex custom application development projects across a diverse range of industries
- Proven, results-focused project management methodology
- Scalable resource structure with offshore facilities that can be leveraged as necessary to achieve budgetary goals

Technologies

- Azure
- Silverlight
- .NET Framework
- ASP.NET
- C#
- Smart Client
- Visual Studio, including Team Foundation Server
- Windows Mobile
- Windows Workflow Foundation
- Windows Communication Foundation
- Windows Presentation Foundation
- Windows Identity Foundation and Windows Card Space

Neudesic began designing and deploying service oriented solutions even before the term Service Oriented Architecture (SOA) became part of application development lexicon. Our SOA projects incorporate the latest web services standards to enable applications that are interoperable, highly scalable and secure.

From the framework's early beginnings, Neudesic has worked closely with Microsoft through each release of .NET. Our developers employ the latest .NET/Visual Studio technology, including Visual Studio Team System and Team Foundation Server, to deliver everything from desktop-deployed smart clients to large-scale web applications running across multiple data centers.

Neudesic continues to work closely with Microsoft through design review sessions for various .NET technologies. Our experts lead training sessions on .NET 3.0, and we already have delivered solutions based the framework's next generation release.

BUILDING CUSTOM SOLUTIONS TO UNIQUE BUSINESS PROBLEMS

As Microsoft certified professionals, Neudesic consultants maintain expert-level competency on every Microsoft development tool and platform. We recognize that growing enterprises have unique business problems, so we employ the appropriate architecture and toolset to tailor solutions that fit the specific needs of our customers. Neudesic's experts can help your company:

- Solve complex architectural and technical issues in a timely and cost effective manner
- Bringing your original ideas to life with custom solutions
- Provide relief for overburdened in-house programmers
- Develop custom plug-ins and application enhancements

- Perform required maintenance to existing applications
- Gain a competitive advantage through improved business processes and systems

MAKING THE APPROACH FIT THE CHALLENGE

The Neudesic Custom Application Development team carefully reviews your requirements and offers a variety of solution methodologies and approaches. We work closely with your team, using the Neudesic Agile Software Development project management methodology, to address project complexities as they arise.

Our broad knowledge of various techniques enable us to leverage the latest Microsoft technologies, such as BizTalk Server and Microsoft Office SharePoint Server, while providing expertise that extends beyond traditional custom software development.

We start with a series of architectural considerations to make certain all issues are properly addressed, and then we use specialized tools and class libraries to expedite the development effort. We also employ team members from Connected Systems, Dynamics CRM, Portals & Collaboration, and SQL/Business Intelligence to address multi-faceted challenges.

Together, we deliver rapid solutions to your immediate programming challenges, helping you:

- Find creative solutions to real business problems
- Avoid costly programming detours
- Leverage your existing systems and technologies
- Manage your software projects and meet business goals

Address your business application needs with a tailored solution from Neudesic.
