

Predictable Excellence

WHEN YOU BRING TOGETHER THE MOST CREATIVE TECHNOLOGY MINDS, EQUIP THEM WITH THE LATEST TOOLS, AND TURN THEM LOOSE ON TODAY'S TOUGHEST BUSINESS CHALLENGES, YOU GET INNOVATIVE SOLUTIONS THAT DRIVE FUTURE BUSINESS SUCCESS. AT NEUDESIC, WE CALL THAT PREDICTABLE EXCELLENCE.

EMPOWERING YOUR BUSINESS THROUGH INNOVATIVE USE OF TECHNOLOGY

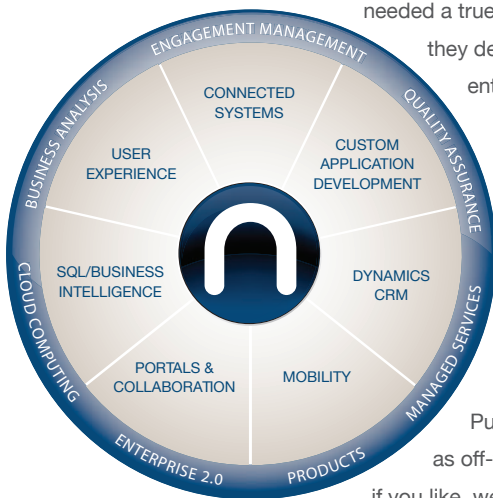

When your business has an efficiency gap that requires a technology bridge, you need an expert who thoroughly understands your industry and has just the right solution to restore the road leading to enhanced business productivity.

Neudesic is a Microsoft National System Integrator and Gold ISV Partner with a proven track record of providing innovative solutions based on Microsoft's technology platform. Our technical and industry expertise empowers enterprises to enhance their technological capacity and respond to business opportunities with greater efficiency.

Developed and tested over years of real-world applications, Neudesic's reliable suite of products, solutions and services gives our team of technology professionals effective tools to address the unique needs of our customers. With extensive expertise in mobility, cloud computing, social collaboration, connected systems, custom application development, Dynamics CRM, portals and collaboration, business intelligence, and other in-demand disciplines, our team is prepared for even the most complex business scenarios.

MEETING YOUR NEEDS WITH PRODUCTS, SOLUTIONS AND SERVICES

While most of our customers have unique business problems, some needs are common to all businesses. That's how Neudesic products are born. When our development team saw that the business world needed a true collaboration product, they developed Neudesic Pulse, enterprise-ready software that adds a deep social layer to any business system or application, fundamentally changing the way businesses acquire, use and share information. We offer Pulse, and all our products, as off-the-shelf solutions, or, if you like, we can assist you in their deployment. Either way, your business technology needs are met quickly and cost effectively.

Neudesic's services are the company's bread and butter. We've assembled an army of experts whose passions span virtually all of Microsoft's key technology competencies, giving us the ability to solve just about any business problem you can throw at us. Based on Microsoft's extensive technology stack, our services have earned us the reputation for delivering innovative technology solutions that meet or exceed the unique business needs of our customers.

Once Neudesic's technology experts solve specific business problems, we pre-packaged their proven solutions to address similar needs of businesses in the same or different industries. And our solutions come with built-in flexibility, so they can be tailored to give our customers the benefit of industry-tested technology developed by experienced Neudesic professionals customized for their specific needs.

DELIVERING MEASURABLE RESULTS THROUGH DEDICATED TEAMWORK

It takes a multi-disciplined approach to develop and deploy successful solutions for complex business situations. For that reason, Neudesic dedicates experienced teams to each discipline. Our discipline managers are industry-recognized experts who have a deep understanding of relevant business scenarios and competitive technologies in their market. They encourage their team members to constantly share ideas and develop the most efficient ways to deliver project results. This collaborative environment fosters the innovation and creativity Neudesic builds into every solution.

LEADING THE WAY TO BUSINESS SUCCESS THROUGH TECHNICAL EXCELLENCE

Through rigorous training and continual support, our consultants achieve the highest standard of technical competency. Many are subject experts, published authors and respected speakers, whose industry designations and certifications further demonstrate the level of expertise and degree of respect they have earned from their peers. Several of our consultants are Microsoft MVPs and Microsoft Virtual Technical Specialist.

Aside from having some of the industry's best and brightest technology minds, Neudesic team members embrace the company's core values of passion, discipline, innovation, teaming and integrity. Our deep involvement with Microsoft's product development teams allows us to deliver solutions that integrate well with their vision for the future of technology. It also helps us maintain our own vision to be The Trusted Technology Partner in Business Innovation.
