NEUDESIC

Bridge the Gap Between Tableau and SAP with Comprehensive Data Connectivity

Challenge

Out of the box, Tableau only connects to some SAP data. Accessing the rest requires complex queries that often yield disparate reports, making it difficult to factor all your data into important decisions.

Solution

Neudesic's proven connectivity solutions give you timely access to ALL your SAP data within Tableau dashboards, so you can take action and make every decision with confidence.

SOURCE -	**SAP BW**	**SAP HANA**	**SAP ECC**
tableau SOFTWARE	✔ BEx Queries ✔ InfoCubes	✔ Native ✔ BW	
NEUDESIC	✔ BEx Queries ✔ InfoCubes ✔ Open Hub ✔ Export DataSources	✔ BW	✔ Tables ✔ Queries ✔ BAPIs ✔ ABAP Reports ✔ DataSources/Extractors

Benefits - Connecting Tableau to all SAP data allows you to:

- Create the most comprehensive view of your organization possible

- Enable self-service analytics and reporting using SAP data

- Increase productivity while reducing IT and training costs

- Maximize your ROI in both Tableau and SAP platforms
