

A photograph of the Golden Gate Bridge at night, illuminated with warm lights against a dark blue sky. The bridge's towers and suspension cables are visible, with a city skyline and lights in the background.

Application & Systems Integration Drives Business Value

Achieve maximum business efficiency by integrating your systems and applications.

APPLICATION & SYSTEMS INTEGRATION

Business and IT leaders looking to improve operational efficiency are **combining existing technology with new investments in cloud and hybrid computing** to drive differentiation and innovation both inside and outside of the organization.

APPLICATION & SYSTEMS INTEGRATION

Neudesic's Application & Systems Integration experts deliver **comprehensive solutions that drive innovation** from systems and software platforms within the enterprise and across business boundaries, while improving efficiency and reducing the operational costs of new and existing assets.

APPLICATION & SYSTEMS INTEGRATION

Getting greater value from your resources

A growing business must meet its needs and challenges with new and existing systems and platforms if it hopes to remain relevant in the marketplace. Before long, however, the value of the whole enterprise begins to fall below the sum of its various parts.

Whether these disparate systems reside on-premise, in the cloud or on partner networks, they must be well-integrated before a business can extend its investment in technology and drive future innovation.

Once achieved, the composition of these systems unlocks an organization's true potential by supporting the consumption of application programming interfaces across any user experience, regardless of platform. Only then can an organization differentiate itself and deliver value at the speed of business.

Are you ready to extend the promise of your technology investments across the enterprise and reap the benefits?

- Users can easily find information and perform the operations required of them
- Users no longer waste time logging in and out of legacy applications while attempting to perform simple tasks
- Systems and processes no longer exist as silos
- Systems integrate well with partner applications
- Shift key workloads to the cloud, or have assets in the cloud that communicate with assets on-premise
- Users and systems grow with your role-based security model

Solving tough challenges with unique insight

Our consultants design, develop and deploy composite solutions that drive differentiation and innovation within your enterprise by unlocking existing investments and building new solutions that are ready for change. Neudesic is a leader in application integration across the technology stack, including BizTalk Server, Neuron-ESB, WCF, WF, and Windows Azure Service Bus. We solve tough distributed challenges, both on-premise and in the cloud, across a range of industries, including transportation, retail, hospitality, finance, healthcare and energy.

With more Virtual Technology Specialists than any other Microsoft National Systems Integrator, Neudesic often helps with training, sales presentations, design reviews, architectural design sessions, proof of concepts, and implementation analysis and remediation for Microsoft's most strategic clients.

Our strong partnership with Microsoft gives us the insight to deliver the best strategic guidance possible, ensuring that every Neudesic engagement is effective, productive and advances the business and IT goals of our customers.

APPLICATION & SYSTEMS INTEGRATION

The Neudesic Advantage

- Expert on-premise and cloud integrators, leveraging best-of-breed capabilities to deliver service-oriented, hybrid composite solutions
- Microsoft certified experts across the integration stack, including BizTalk, WCF and WF
- Microsoft Application Integration MVPs and Regional Directors
- More Microsoft Virtual Technology Specialists than any other U.S. partner
- Authors of industry leading publications and books related to cloud, hybrid and distributed computing
- Thought leadership at industry-wide events, including TechEd, VSLive, Code Camp and .NET user group meetings

Technologies

- Microsoft BizTalk Server
- Neudesic Neuron-ESB
- Neudesic Industry Accelerators (EDI, Gaming)
- Windows Azure Service Bus
- Windows Azure Access Control
- Windows Communication Foundation
- Windows Workflow Foundation
- Windows Server AppFabric

Applications

- Dynamics CRM
- Oracle
- PeopleSoft
- JD Edwards
- SAP
- BAAN
- Siebel
- Salesforce

Database

- Oracle Database
- DB2
- Microsoft SQL Server

Neudesic is the trusted technology partner in business innovation, delivering impactful business results to clients through leading-edge technologies, innovative solutions and strategic alliances. Founded in 2002 and headquartered in Irvine, California, Neudesic is a privately held company, serving clients globally from offices across the United States.
