

Integration Evolved

Still using webMethods? There's an easier, more cost effective solution.

Integration platforms that aren't cloud and mobile friendly, or require extensive support, are going the way of the dinosaur.

More businesses are moving their integration solutions from webMethods to BizTalk Server because it's easier to use, more cost effective, and delivers powerful capabilities like:

- Hybrid cloud integration
- REST support for mobile
- SOA and ESB solutions
- Business activity monitoring
- Business process management
- Dozens of easy-to-use adapters

Neudesic's experience and proven approach to migrating integration solutions from webMethods to BizTalk Server made us a Microsoft 2013 Integration Partner of the Year finalist.

Let us show you how to save time and money by simplifying your integration efforts with BizTalk Server 2013.

SCHEDULE YOUR ENGAGEMENT TODAY:

1 WEEK OR 40 HOURS • [Call today for special pricing.](#)

Neudesic can help you get integrated. To learn more about our products and services, call (800) 805-1805, or visit our website at www.neudesic.com.

Our Proven 4-Step Proof-of-Concept Process

01

NEEDS ANALYSIS

We interview key technical and functional personnel to gain a comprehensive understanding of your existing webMethods solutions and determine the current and desired state of your organization. We then help you identify one interface to migrate as part of a POC.

02

DESIGN

We employ a collaborative design process. First we study your current system as-is; then we engage in a fusion process with your subject matter experts to understand your goals and objectives. We use this knowledge to finalize the architecture of your solution.

03

DEVELOPMENT

After we complete a design, Visio diagram, and fusion document, we develop the equivalent BizTalk Server application, demonstrating key functionality and desired output that align to your specific goals and environment.

04

DOCUMENTATION

Your engagement isn't complete until we provide you with:

- Vision, scope and requirements documents
- Requisite system design specifications
- A Proof of Concept solution for the migrated interface
- An outline of engagement specifics and recommendations for the broader migration opportunity
