

The Azure Cloud Optimization Assessment

Maintaining a more simple, cost effective cloud environment with increased visibility, compliance, and overall performance.

Our three-day cloud optimization assessment is designed to help clients reduce the complexity of their cloud environment to achieve more by spending less. Our proven cloud frameworks and best-practices, along with our extensive experience providing continuous cloud monitoring, analysis, and adjustment services, enable us to balance cost, workload performance, and compliance to help your organization:

**OPTIMIZE CLOUD
ARCHITECTURES**

**IMPROVE AVAILABILITY
& UPTIME**

**REDUCE CLOUD SPEND
& INCREASE ROI**

**ENHANCE SECURITY
& COMPLIANCE**

OUR APPROACH

During the assessment, we provide the following:

- Introduction to cloud optimization, automation and best-practices
- High-level analysis of your application environment
- Initial assessment of reliability, performance, cost, and operations
- Identification of any security and compliance gaps
- Assessment of exiting tooling and team capabilities

OUTCOMES FOR YOUR ORGANIZATION

At the conclusion, clients receive the following:

- High-level optimization roadmap and implementation plan
- Cost savings initiative inventory
- Recommendations for tools and capability enhancements
- Partner investment fund identification to offset planning and implementation costs
- An executive presentation summary with recommendations
