

The IT Optimization Workshop

Delivering more efficient, cost-effective value from your IT organization

Our no-cost IT optimization workshop is designed to help clients develop a mix of quick wins and long-term strategies to enhance the efficiency of their IT teams, while also driving strategic initiatives for the lines of business that reduce cost and increase customer value.

With strategies for aggressive, selective, or targeted cost optimization, and repeatable frameworks that take into account the time involved for each project, the level of disruption associated, the risk that needs to be managed, and the overall project time to value, our approach enables us to meet the unique needs of our diverse clients.

OUR APPROACH

- During the 1/2 day workshop, we conduct the following:**
- Define company savings objectives and IT/Business strategy
 - Conduct an efficiency review across the following areas:
 - IT Project Portfolio
 - Data center and cloud workloads
 - Data platform infrastructure
 - Existing process and capabilities
 - Workforce benchmarking, capacity and structure

OUTCOMES FOR YOUR ORGANIZATION

- At the conclusion, clients will receive the following:**
- Cost savings initiative inventory
 - High-level initiative investment and ROI analysis
 - Partner investment fund identification to offset planning and implementation costs
 - Initial roadmap for cost savings and an implementation plan that aligns to goals
