FOR IMMEDIATE RELEASE

Neudesic Pulse 4.2 Enterprise Collaboration Platform Offers Secure Mobile and Web-based File Sharing for Employees, Partners and Customers

*On-Premise Content Can Be Selectively Shared with Customers and Partners
Providing Full Data Ownership, Security and Privacy*

IRVINE, CALIF. – May 5, 2014 – Neudesic today announced availability of [Neudesic Pulse](#) 4.2 enterprise collaboration software which delivers a number of enhanced features that enable broad [file sharing](#) capabilities. These new capabilities allow users to securely share documents throughout the enterprise as well as with external individuals such as customers and vendors, while still providing full data ownership for eDiscovery and data retention.

With Neudesic Pulse 4.2, users have folder-level access rights for greater control of [shared files](#). They can organize digital files via the file app repository, share files with a group, upload new files with automatic versioning, preview documents, and provide comments for designated viewers to see.

“Our clients understand the value of collaboration but also have a need to protect their business information,” said Jason Noble, general manager, Neudesic Pulse. “They loved the idea of cloud-based file sharing but realized the inherent security risks in doing so. With Neudesic Pulse 4.2, we’re helping them share files efficiently with the assurance that their files are secure in web-based and mobile environments.”

Neudesic Pulse 4.2 enables users to easily share files both within the enterprise and with external audiences such as customers, vendors and alliance partners. The solution facilitates greater file-based collaboration in which users can view the file as they are collaborating on it. Files can be accessed on the web or via native mobile clients across all major platforms. Users can also access the file audit history – how often a document is viewed, downloaded and shared. Unlike the capabilities of cloud providers, Pulse 4.2 allows files to be housed on premises, secure and controlled by the enterprise.

Pulse 4.2 Availability

Neudesic Pulse 4.2 is available now. To learn more or to schedule a demonstration, visit the [Pulse website](#) or email [us](#).
