

# Leading Healthcare Company: Reducing IT Spend by 30% and Saving \$3M/Year with Cloud Migration, Modernization and Optimization

## Challenge:

The client was experiencing major IT and infrastructure challenges with their on-prem servers. They wanted to get out of the datacenter business and refocus their efforts on healthcare which resulted in a need to:

- Access data and analytics
- Enable end-users to work more flexibly and remotely while using legacy applications
- Modernize their applications to improve user productivity

## Solution:

The client partnered with Neudesic to transform their datacenter, collaboration platforms, applications, and data. This included:

- Creating a foundation for the migration and modernization initiative
- Performing an application cloud readiness assessment
- Migrating Exchange and SharePoint from on-prem to online
- Migrating all applications and databases to Azure
- Optimizing Alignment's cloud costs

## Impact:

The client's transformation only took four months to complete and resulted in:

- Moving 300 servers to Azure and modernizing multiple application workloads
- Deploying Office 365 to end-users
- Removing limitations imposed by hardware, space and ramp-up schedules, allowing for continuous development and faster time to market
- Meeting the most stringent HIPAA compliance standards

## Highlights:

### 30%

Reduction in overall IT spend

### \$3M/Year

Savings with cloud optimization services

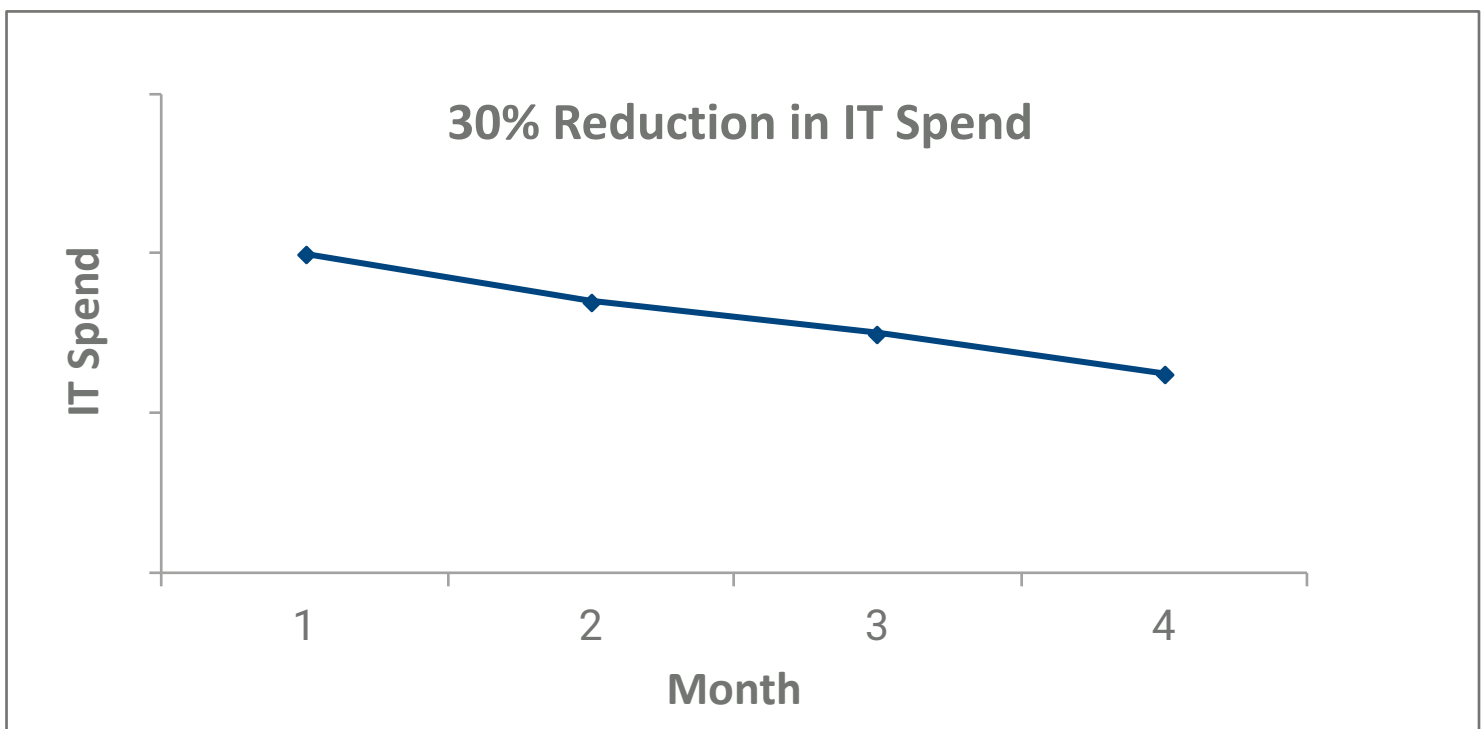

## HEALTHCARE PROVIDER QUICK STATS
