

Optimize Provider Network Operations with Credentialing Automation

Create a Seamless Comprehensive Provider Record

Neudesic's Credentialing Accelerator is a repeatable Azure-based solution built in compliance with CMS standards to provide a seamlessly integrated platform for Payers and Providers. Utilizing industry best practices, the Credentialing Accelerator provides a portal view of credentialing, enabling AI-driven process automation, and increasing data accuracy, while reducing credentialing time and associated costs by up to 85%.

Reduce overall credentialing TIME and COST by up to 85% with an automated end-to-end solution

Remove provider data silos with a customizable solution aligned to your digital transformation strategy

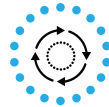

Real-time insights into application processes and updates

Increase Provider participation and satisfaction with efficient, transparent data management

Reduce risk of CMS and regulatory non-compliance

Seamless integration with credentialing repositories – Cactus, CRMs, etc.

Increase Payer and Provider interoperability while eliminating manual, time-intensive processes

Key Components include:

- ✓ Data Platform Accelerator
- ✓ Knowledge Mining / Document Intelligence Platform
- ✓ AI-driven Intelligent Workflows
- ✓ App Modernization and Rationalization
- ✓ Master Provider Index – Profiles and Preferences
- ✓ Zero Trust Landing Zones

At Neudesic, we bring our expertise in healthcare and technology to create a personalized, seamless, and intuitive experience for all stakeholders in the healthcare ecosystem. Our mission is to empower patients, providers, payers, and life sciences organizations with innovative solutions that drive improved health outcomes while reducing costs; ultimately making healthcare accessible, affordable, efficient, and equitable for all.
