

Neudesic's Migration Accelerator – BizTalk to Azure in 30 days

Neudesic helps jump-start Healthcare organizations to Azure adoption by leveraging and applying best practices for BizTalk Migration. Our 4-week accelerator migrates existing BizTalk workloads to equivalent Azure Integration Services (AIS). We start with the discovery and analysis phase with the existing BizTalk process and generates equivalent Azure Integration Services components via automation, saving customers up to 90% development effort. Additionally, the accelerator stands up mature AIS Devops, Governance, and COE, making it easier to adopt Azure Cloud within your organization.

This accelerator contains:

- One-click automated migration tool to generate AIS resource out of existing Biztalk environment
- CI/CD pipeline with ready infrastructure as code, ARM templates, & PowerShell scripts
- FHIR Integration via API, OAuth, Compliance, Connectivity, HL7 Schemas
- Plug and play common integration modules with pre-built dashboard for Monitoring and Observability

Business Impact

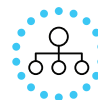

Unmatched security, scalability, and reliability

Reduce on-prem BizTalk cost and maximize your cloud investment by leveraging AIS

Drastically reduce costs of implementing a new business process

Change Management by adopting COE

Investment*
\$5,000 - \$50,000
